### **DETAILED ACTION**

1. This is a response to the communication, filed 6/10/04.
2. Claims 1-38 are pending.

#### ***Response to Amendment/Arguments***

3. Applicant's arguments, filed 6/10/04 (pages 10-17), are persuasive to overcome the previous prior art rejections to claims 1-38. More specifically, Applicant argues that Estakhri does not teach the translation pointer structure being part of the memory and that the pointer structure of Estakhri does not wherein the pointer structure concurrently maintains a first correspondence between a logical sector address and a first physical sector address at which currently valid data identified by the logical sector address is stored and a second correspondence between the logical sector address and a second distinct physical sector address at which previously valid data identified by the logical sector address has been stored. The Examiner concurs with Applicant's arguments, filed 6/10/04. Accordingly, claims 1-38 are now allowable over the prior arts of record.

#### ***Allowable Subject Matter***

4. Claims 1-38 are allowed for reasons indicated above.

#### ***Conclusion***
